Executive Summary

For professionals credentialed by the Kansas Behavioral Science Regulatory Board in 2000:

- The most numerous type of behavioral science professional in Kansas was Social Workers, comprising 69.4% of individuals licensed by the Behavioral Science Regulatory Board.
- Social Workers (associate level social workers, bachelors social workers, masters social workers, and specialist clinical social workers) had the lowest ratio of population to professional (529:1) of any type of behavioral professional.
- The majority of behavioral science professionals with mailing addresses in Kansas (62.5%) had mailing addresses in urban counties, while only 1.3% had a mailing address in a frontier county.
- Social workers, psychologists, and counselors and therapists had the highest ratios of persons per professional in frontier and rural counties; the lowest ratios were in urban and semi-urban counties.

Introduction

This document, "Review of Kansas Behavioral Science Regulatory Board Professional Data, 2000", is part of a series of publications requested by the Health Care Data Governing Board (HCDGB) to make information available about the health care system in the state of Kansas. A brief summary regarding this request for an inventory of health care professionals can be found in the series preface at the beginning of the associated notebook.

Information presented in this document provides an overview of the professionals credentialed by the Kansas Behavioral Science Regulatory Board (BSRB), specifically: associate level social workers, bachelors social workers, masters social workers, specialist clinical social workers, marriage and family therapists, clinical marriage and family therapists, masters level psychologists, clinical psychotherapists, psychologists, professional counselors, clinical professional counselors, and registered alcohol and other drug abuse counselors.* This report is based on credentialing data submitted to the HCDGB by the Kansas Behavioral Science Regulatory Board for 2000.

Data collected by the BSRB did not include practice locations or business addresses for behavioral science professionals; therefore, practice locations could only be inferred from mailing addresses. It is impossible to determine whether behavioral science professionals with mailing addresses outside the state are active in Kansas or whether behavioral science professionals with mailing addresses in Kansas are active outside of Kansas. In addition, the credentialing information provided by the BSRB does not include information on work status—whether credentialed individuals work full or part time. A list of the variables included in the BSRB database is included in Appendix B.

_

^{*} Definitions for credentials are provided below.

Behavioral Science Professionals

The Kansas Behavioral Science Regulatory Board credentials associate level social workers, bachelors social workers, masters social workers, specialist clinical social workers, marriage and family therapists, clinical marriage and family therapists, masters level psychologists, clinical psychotherapists, psychologists, professional counselors, clinical professional counselors, and registered alcohol and other drug abuse counselors. In 2000, the BSRB credentialed 7,605 professionals, of which 7,319 listed a mailing address in Kansas (Figure 1, Table 1, and Appendix A, Table A). In addition, of the 286 behavioral science professionals with mailing addresses outside of Kansas, 227 had a mailing address in one of the four surrounding states: Missouri 215, Oklahoma 6, Colorado 4 and Nebraska 2.

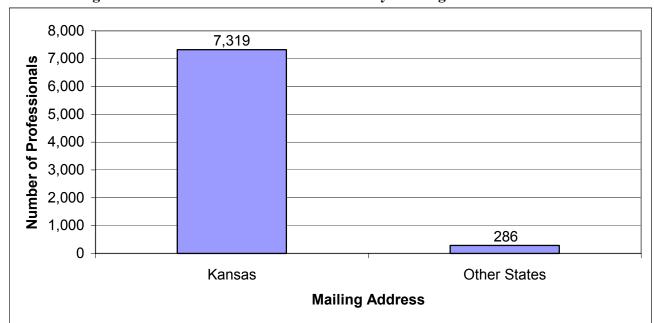

Figure 1: Behavioral Science Professionals by Mailing Address

Table 1: Behavioral Science Professionals by Mailing Address

Mailing Address	Number	Percent
Kansas	7,319	96.2
Other States	286	3.8
Total	7,605	100.0

There were 367 persons per behavioral science professional in Kansas in 2000. Fourteen counties had fewer persons per behavioral science professional than the state ratio, ninety-one counties had more, and three counties (Lane, Greeley and Clark) had no behavioral science professional (Figure 14 and Appendix A, Table A).

Behavioral Science Professions

For the purposes of this report, the behavioral science professions have been divided into three groups: Social Workers, Psychologists, and Counselors and Therapists.

In 2000, there were 5,081 associate level social workers, bachelors social workers, masters social workers, and specialist clinical social workers credentialed in Kansas and having mailing addresses in Kansas. There were 529 persons per social worker in the state, with 13 counties having a lower ratio of persons per social worker and 92 counties having a higher ratio. There were six counties with no social worker (Figure 17).

Masters level psychologists, clinical psychotherapists, and psychologists comprised the next largest group, with 1,151 individuals credentialed by the BSRB and having mailing addresses in Kansas. There was a statewide ratio of 2,336 persons per psychologist, with 25 counties having a lower ratio and 80 counties having a higher ratio. There were 45 counties with no psychologist (Figure 19).

Counselors and therapists (including marriage and family therapists, clinical marriage and family therapists, professional counselors, clinical professional counselors, and registered alcohol and other drug abuse counselors) comprised the smallest group, with 1,087 individuals credentialed. There was a statewide ratio of 2,473 persons per counselor or therapist, with 26 counties having a lower ratio and 79 counties having a higher ratio. There were 35 counties with no counselor or therapist (Figure 21).

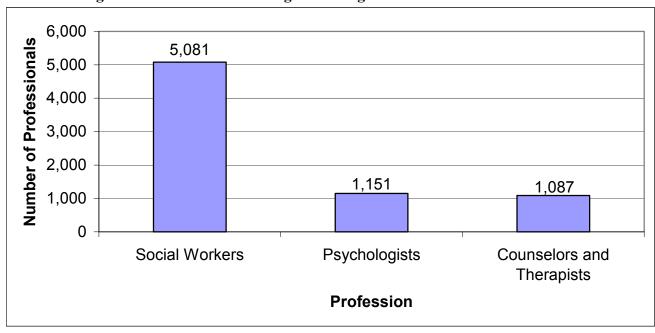

Figure 2: Professionals Having a Mailing Address in Kansas

Table 2: Professionals Having a Mailing Address in Kansas

			Persons per
	Number	Percent	Professional
Social Workers	5,081	69.4	529
Psychologists	1,151	15.7	2,336
Counselors and Therapists	1,087	14.9	2,473
All Professionals	7,319	100.0	367

Social Workers

There were 5,235 social workers credentialed by the BSRB, of which 5,081 (97%) had a mailing address in Kansas. Of the 154 with mailing addresses outside of Kansas, 134 had a mailing address in an adjacent state: Missouri 129, Oklahoma 3, and Colorado 2.

Licensed Associate Level Social Workers (LASW). The BSRB no longer credentials LASWs; however, previously credentialed LASWs are permitted to renew their licenses. There were 59 LASWs in 2000, with all 59 having a mailing address in Kansas.

Licensed Bachelor Social Worker (LBSW) – Individuals must have a Bachelors degree in Social Work from a CSWE approved program or a program approved by the BSRB, have 3 professional references, and have completed a basic level competency exam (Behavioral Science Regulatory Board, 2000). There were 2,182 LBSWs in 2000, with 2,158 of those having a mailing address in Kansas. There were 19 LBSWs with mailing addresses in Missouri, and 2 in Colorado. The ratio of persons per LBSW was 1,246 statewide; 38 counties had a lower ratio, and 11 counties had no LBSWs (Appendix A, Table B).

Licensed Master Social Worker (LMSW) - Individuals must have a Masters degree in Social Work from a CSWE accredited program or a program approved by the BSRB, have 3 professional references, and have completed a basic level competency exam (Behavioral Science Regulatory Board, 2000). There were 1,681 LMSWs in 2000, with 1,596 of those having a mailing address in Kansas. There were 74 LBSWs with mailing addresses in Missouri, 2 in Colorado and 1 in Oklahoma. The ratio of persons per LMSW was 1,684 statewide; 14 counties had a lower ratio, and 31 counties had no LMSWs (Appendix A, Table C).

Licensed Specialist Clinical Social Worker (LSCSW) - Individuals must have a Masters degree in Social Work from a CSWE accredited program or a program approved by the BSRB, have 3 professional references, have 4000 hours of post-graduate supervised clinical work experience in a clinical setting with supervisor's attestation, and have completed the Clinical Competency Exam (Behavioral Science Regulatory Board, 2000). There were 1,313 LSCSWs in 2000, with 1,268 of those having a mailing address in Kansas. There were 36 LSCSWs with mailing addresses in Missouri. The ratio of persons per LSCSW was 2,120 statewide; 9 counties had a lower ratio, and 40 counties had no LSCSWs (Appendix A, Table D).

Figure 3: Social Workers in Kansas

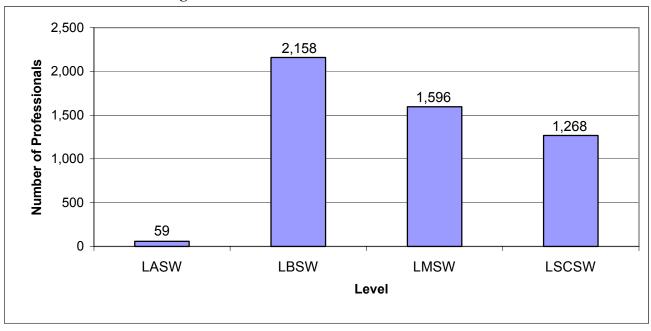

Table 3: Social Workers in Kansas

	Number	Percent	Persons per Social Worker
LASW	59	1.1	45,566
LBSW	2,158	42.5	1,246
LMSW	1,596	31.4	1,684
LSCSW	1,268	25.0	2,120
Total	5,081	100.0	529

Psychologists

In 2000, the BSRB licensed 1,238 psychologists, of which 1,151 (93.0%) had a mailing address in Kansas.

Legislation passed during the 1999 session of the Kansas legislature created new levels of independent clinical licensure for masters level psychologists in Kansas. The new levels will not be fully instated until July 2002. The new levels will be: Licensed Masters Level Psychologist and Licensed Clinical Psychotherapist.

Licensed Masters Level Psychologist (LMLP) One who has a Masters degree from a program approved by the American Psychology Association or by the BSRB in the field of psychology and who has passed a nationally standardized competency exam (Behavioral Science Regulatory Board, 2000). There were 533 masters level psychologists in Kansas in 2000; 8 had mailing addresses in the state of Missouri. There were 5,044 persons per LMLP statewide, with 33 counties having a lower ratio; 49 counties had no LMLP (Appendix A, Table G).

Licensed Clinical Psychotherapist (LCP) One who has a masters degree from a program approved by the American Psychology Association or by the BSRB in the field of psychology, has 4000 hours of supervised clinical experience under an approved clinical training plan, and has passed a nationally standardized competency exam (Behavioral Science Regulatory Board, 2000). There were 75 licensed clinical psychotherapists in Kansas in 2000; 4 had a mailing address in the state of Missouri. There were 35,846 persons per LCP statewide, with 9 counties having a lower ratio; 65 counties had no LCP (Appendix A, Table F).

Licensed Psychologist (LP) One who has a doctoral degree from a program approved by the American Psychology Association or by the BSRB in the field of psychology, has completed 2 years of supervised work experience, and has passed a nationally standardized competency examination (Behavioral Science Regulatory Board, 2000). There were 543 licensed psychologists with mailing addresses in Kansas in 2000, 41 with mailing addresses in Missouri, 2 with mailing addresses in Nebraska, and 1 with a mailing address in Oklahoma. There were 4,951 persons per LP statewide; 9 counties had a lower ratio, and 65 counties had no LP (Appendix A, Table E).

LP	543	47.2	4,951			
Total	1,151	100.0	2,336			

Counselors and Therapists

Professional Counselors

In 2000, the BSRB licensed 585 professional counselors, with 554 having a mailing address in Kansas and 27 in an adjacent state: 25 in Missouri and 2 in Oklahoma.

Legislation passed during the 1999 session of the Kansas legislature created new levels of independent clinical licensure for professional counselors in the State of Kansas. These levels will not be fully instated until July 2002. The new levels will be licensed professional counselor and licensed clinical professional counselor.

Licensed Professional Counselor (LPC) One who has a masters degree in counseling, including 60 hours, with credits distributed among the 9 core areas of professional development, has completed a supervised practicum, and has passed a nationally standardized competency exam (Behavioral Science Regulatory Board, 2000). There were 504 licensed professional counselors with mailing addresses in Kansas in 2000, and 12 with mailing addresses in adjacent states: 11 in Missouri and 1 in Oklahoma (Appendix A, Table K).

Licensed Clinical Professional Counselor (LCPC) One who is a licensed professional counselor, has completed 4,000 hours of supervised clinical experience under an approved clinical training plan, and has passed a nationally standardized clinical exam (Behavioral Science Regulatory Board, 2000). There were 50 LCPCs with mailing addresses in Kansas in 2000; 14 had mailing addresses in Missouri and 1 had a mailing address in Oklahoma (Appendix A, Table J).

Licensed Marriage and Family Therapist

Legislation passed during the 1999 session of the Kansas legislature created a new level of independent licensure for marriage and family therapists in the State of Kansas. This level was instituted on July 1, 2000. There were 437 marriage and family therapists in 2000, with 428 having mailing addresses in Kansas; 6 reported a mailing address in Missouri. There are currently two levels of marriage and family therapists licensed by Kansas: licensed marriage and family therapist, and licensed clinical marriage and family therapist.

Licensed Marriage and Family Therapist (LMFT) One who has a Masters or Doctorate degree in Marriage and Family Therapy or a related field involving course work considered to be equivalent to the Marriage and Family therapy program, has 3 professional references, and has passed a nationally standardized exam at the basic level (Behavioral Science Regulatory Board, 2000). There were 374 LMFTs with mailing addresses in Kansas and 3 LMFTs with a mailing address in Missouri (Appendix A, Table H).

Licensed Clinical Marriage and Family Therapist (LCMFT) One who is a licensed marriage and family therapist, has 4,000 hours of supervised clinical experience under an approved clinical training plan, and has passed a nationally standardized exam at the clinical level (Behavioral Science Regulatory Board, 2000). There were 54 LCMFTs with a mailing address in Kansas, and 3 with a mailing address in Missouri (Appendix A, Table I).

Registered Alcohol and Other Drug Abuse Counselor

Registered Alcohol and Other Drug Abuse Counselor (RAODAC) One who is a currently licensed provider, has successfully completed a Bachelors, Masters or Doctorate degree in social services or a health related field (including 18 hours in specific core course content areas, 500 hours of practicum experience, 2,500 hours of supervised work experience which includes 1,000 hours within the 3 years preceding application), and has passed a nationally standardized competency examination (Behavioral Science Regulatory Board, 2000). There were 105 RAODACs with mailing addresses in Kansas in 2000, and 2 reported a mailing address in Missouri (Appendix A, Table L). Most health care professionals credentialed for drug and alcohol treatment are credentialed through the DCCCA, Inc. For a more complete picture of the availability of drug and alcohol treatment in Kansas review of DCCCA, Inc. data is needed.

Demographics

Gender

Of the 7,605 individuals credentialed by the BSRB, 5,025 or 66.1% were female, 1,324 or 17.4% were male, and data were missing in 1,256 or 16.5% cases (Figure 6 and Table 6).

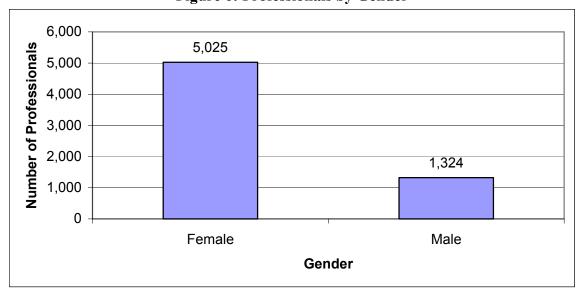

Figure 6: Professionals by Gender

	Number	Percent			
Female	5,025	66.1			
Male	1,324	17.4			
Not Stated	1,256	16.5			
Total	7,605	100.0			

Education

Data on education were missing for 1,182 behavioral science professionals. It was possible to impute data for 1,162 these individuals based on the minimum educational requirements for their profession (*e.g.* a LBSW who did not list any degree was assumed to have a bachelors degree). More than half (57.75% or 4,380) of the behavioral science professionals credentialed by BSRB held masters degrees, and almost a third (31.59% or 2,396) held bachelors degrees (Figure 7 and Table 7).

Social Workers by Education

The majority of credentialed behavioral science professionals held the minimum degree required by the credentialing board. The majority of both LASWs and LBSWs held bachelors degrees, while most LSCSWs and LMSWs held masters degrees. There was no LASW with a masters degree, and only 7 LBSWs had a masters degree. In addition, there was one LMSW with a Ph.D. and 9 LSCSWs with a Ph.D. There were also 99 LMSWs and 6 LSCSWs who reported having only a bachelors degree in spite of the fact that the minimum degree necessary for their license was a masters degree (Figure 9 and Table 9).

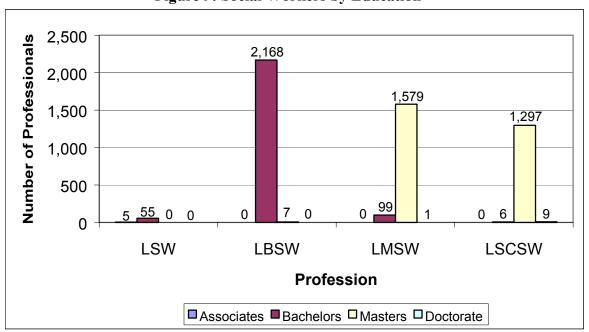

Figure 9: Social Workers by Education

Psychologists by Education

Most LPs (599 or 97.24%) had Ph.D.s, but 17 reported having either a bachelors degree (1) or a masters degree (16) in spite of the requirement of a Ph.D. for licensing as an LP. The majority of LMLPs and LCPs had masters degrees, and 41 had Ph.Ds. (Figure 13 and Table 10).

Counselors and Therapists by Education

More than 80% of all counselors and therapists, with the exception of RAODACs, held masters degrees: LCMFTs 83.6%, LMFTs 84.4%, LCPCs 80.6%, and LPCs 84.7%. RAODACs were more evenly divided between masters degrees (42.2%) and bachelors degrees (53.9%). Furthermore, 13.9% of counselors and therapists held a doctorate: LCMFTs 14.8%, LMFTs 14.8%, LCPCs 17.9%, LPC 14.7% and RAODACs 3.9%. One LCMFT and one LMFT had MD degrees (Figure 11 and Table 11).

Profiles by Peer Groups of Counties

For the purposes of demographic analysis, counties in Kansas have been grouped by population density into "Peer Groups", as defined by the Office of Local and Rural Health of the Kansas Department of Health and Environment. Frontier counties are defined as those with less than 6 persons per square mile, Rural counties as those with 6-19.9 persons per square mile, Densely-Settled Rural counties as those with 20-39.9 persons per square mile, Semi-Urban counties as those with 40-149.9 persons per square mile, and Urban counties as those with 150 or more persons per square mile. Counties within a peer group are not necessarily contiguous, and the definition of "Peer Groups", as used here, should not be confused with the U.S. Census Bureau's definition of urban and rural areas. Using the above definition, Kansas has 31 frontier counties, 39 rural counties, 21 densely-settled rural counties, 9 semi-urban counties and 5 urban counties (Appendix C, Figure 22).

The majority of behavioral science professionals (4,574 or 62.5%) had mailing addresses in urban counties; the fewest (94 or 1.3%) had mailing addresses in frontier counties. Frontier counties also had the highest ratio of persons per behavioral science professional (1,049), while urban counties had the fewest persons per behavioral science professional (306) (Figures 12 and 13 and Table 12).

Behavioral Science Professions by Peer Group Counties

In all five peer groups, social workers were the most numerous type of behavioral science professional, making up between 67% and 78% of the total number of behavioral science professionals (urban 70.0%, semi-urban 68.2%, densely-settled rural 67.1%, rural 70.4%, and frontier 78.7%). Therapists and Counselors were the least numerous professionals in urban (662), densely-settled rural (157), and rural (57) counties of the state, while psychologists were the least numerous professionals in semi-urban (180) and frontier (6) counties (Figure 15 and Table 13).

These numbers are also reflected in the ratio of persons per professional. For social workers, psychologists, and counselors and therapists, the highest ratios were in frontier and rural counties and the lowest were in urban and semi-urban counties.

Psychologists by Peer Group Counties

LMLPs were the most numerous type of psychologist in all peer groups except Urban, and were the only type of psychologist with mailing addresses in Frontier counties. LPs were most numerous in the urban counties, while LCPs were the least numerous in all five regions (Figure 18 and Table 15).

Counselors and Therapists by Peer Group Counties

LPCs were the most numerous professionals in urban, densely settled rural, rural and frontier peer groups; LMFTs were the most numerous in the semi-urban peer group. LCMFTs and LCPCs tied for the least numerous in urban and rural peer groups, and with RAODACs in Frontier. LCPCs were the least numerous in semi-urban counties and LCMFTs were the least numerous in densely-settled rural counties (Figure 20 and Table 16).
